Committee Notes

Annual Child Care Center Immunization Reporting Update- Wendy Holmes

Wendy Holmes shared with the committee that the reporting forms had been changed for the reporting period of FY16. The data from those reports is currently being reviewed. The form and reporting process will not be changed again this year. She stated that there is a recommendation from some staff to change the reporting for the centers to report immunizations as a whole instead of by each child, but the recommendation is still being discussed and will not be implemented this year.
