

Access. Affordability. Accountability. Jobs.

The Value of Closing the Health Insurance Coverage Gap

Closing the health insurance coverage gap in North Carolina would mean half a million working-age citizens would gain access to affordable insurance. A healthy workforce is more productive and leads to a stronger state economy, more jobs, and more local economic activity, especially in struggling rural communities. Join us for an interactive discussion about a single policy change that could greatly improve our state's economy, employment opportunities, and health.

October 28, 2016

Campbell University
Taylor Hall, Room 118, First Floor
